

USP2L

Telephone and Power Lightning Surge Protector

USP2L is Telephone and Power Lightning Surge Protector. *Our 24 months warranty will include Surge and Lightning if the USP2L is installed with our AeGIS and Quantum products. If the USP2L is installed after the system is installed, the warranty will follow the system's remaining warranty.*

WARNING

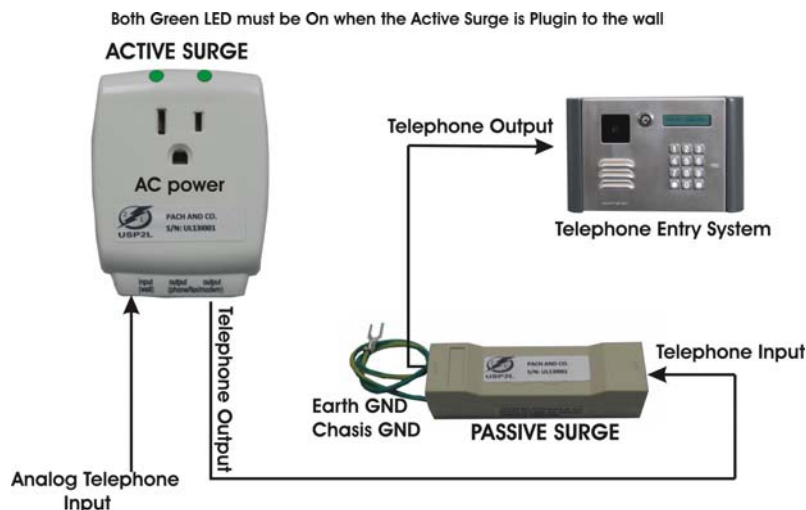

Due to the complexity of MS79xxx and MX79xxx with the telephone network to each apartment, the USP2L lightning warranty does not include MS79xxx and MX79xxx.

What is in the USP2L package?

1. Active Power and Telephone Lightning Surge Protector with serial number
2. Passive Telephone lightning Surge Protector with serial number
3. Extra sticker with serial number as below must be attached to your protected system. The serial number will be matched between the USP2L and protected system. If the system and USP2L were purchased at same time, the sticker will be attached to the system.

Both parts must be installed to warrant against lightning and power surge per schematic diagram below.

HOW TO CLAIM THE WARRANTY IF THE SYSTEM FAIL TO LIGHTNING OR SURGE

1. The **AeGIS** and **Quantum** System must be installed properly with the USP2L as shown above.
2. You must email us or text us the image of the serial number on the USP2L and the system connected to the USP2L. The system will have matching serial number as the USP2L.
3. We will issue an RMA for advance replacement.
4. Return the defective unit as soon as you received the advance replacement
